LX8000 firmware update procedure

Copy firmware to SD card.
Insert sd card into LX8000
Enter password start update 89891.
If firmware is found on SD card, Lx8000 will ask you for an update code.

….

If update code is correct, you will not get a message for wrong code.
Progress will run to 100%
Lx8000 will reboot.
If lx8000 does not reboot after a minute turn it off and on back.
LX8000 is restarting now with new version.
