## 5" Disk brake wheel Penta

p/n 055520

Mass:

1420 g = mass reduction 1000 g resp. 40 %  
compared with 5" Standard disk brake wheel

Really easy to mount thanks to asymmetric split.  
Pinching of the tube while screwing together the  
wheel halves cannot happen anymore.

Compact dimensions, only 100 mm installation width

### Description

Fivefold screwed wheel halves

CNC milled from solid aluminium

With maintenance-free high quality ball bearings

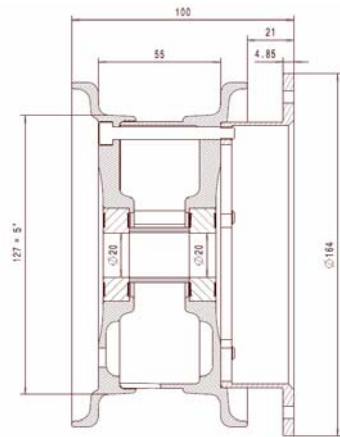

With distance bushing, for axial bracing on stub shaft or axle

Hub surface anodised in blue

With flanged vented brake disk

For brake assembly 30-9 Cleveland

Hydraulic system with brake fluid DOT 4

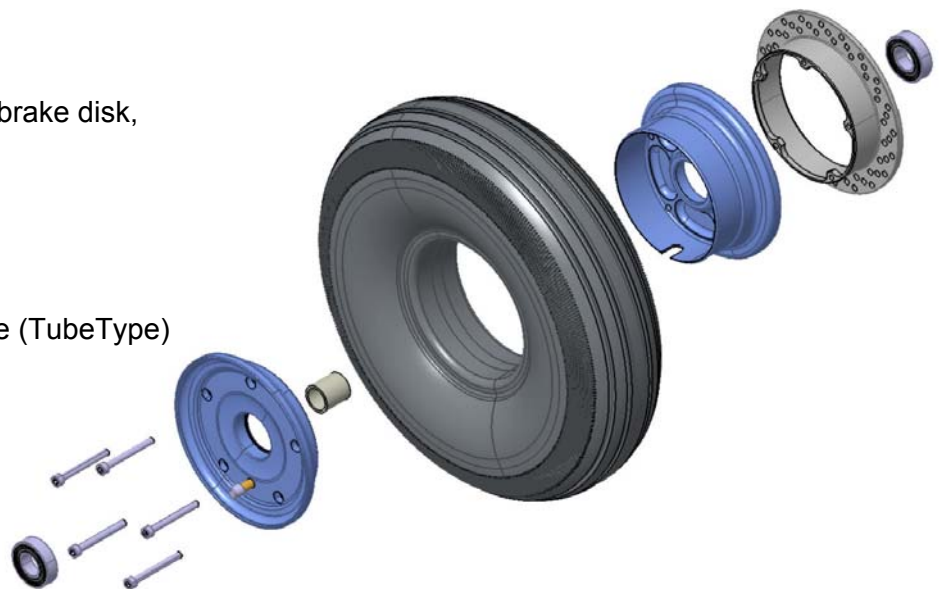

### Dimensions

Installation width 100 mm incl brake disk,  
ball bearing 20 mm

### Application

Disk brake wheel for aircraft

with 5" pneumatic tire with tube (TubeType)

Issue 04/09
